

CLEANING AND CARE RECOMMENDATION

FUR CARPETS

Congratulations on having acquired a uniquely special carpet with optimum wear behaviour. A little time, effort and regular care will ensure your carpet stays beautiful. Observe the following instructions and you'll enjoy your new carpet immensely.

AVOID SHARP-EDGED OBJECTS

Do not push any sharp-edged furniture over the carpet. Due to the production process, there may still be protruding fibres and loose yarns in the pile. You can vacuum or trim them away easily.

VACUUM REGULARLY

It is particularly important to vacuum your carpet regularly from day one. Do not use rotating brushes to vacuum your carpet. Rotating brushes may cause felt formation if used for longer periods. Fluff may form during the first few weeks and months but this is completely normal. Loose fibres from production may come away from the pile little by little during use or when you walk over the carpet. You therefore need to vacuum your carpet more regularly.

PREVENT WEAR

You can prevent pressure marks, wear in confined areas and any discolouration caused by sunlight by turning your carpet around from time to time. Flattened stepped on areas on very soft pile materials are commonplace. Do not place any flowerpots on your carpet either.

Do not use any common household cleaning agents such as dish-washing detergent or glass cleaners. Such products penetrate deep into the fibres and are difficult to remove with clean water. The carpet will soon get dirty again due to the cleaning product residue left in the pile.

STAIN REMOVAL

We are all well aware that most dirt is brought into the home from outdoors and is trodden into the carpet. The best way to keep things clean is to stop dirt entering the home in the first place. However, if a stain should appear on your carpet, you should treat it immediately.

SPECIAL ADVICE

This rug is washable at 30 degrees in the delicate mode.

Attention: Textile fibres get dirty very easily in a moist status. We therefore recommend to hung up the rug to dry. Please avoid usage of clothes pegs while drying.

No warranty claims can be made based on the recommendations in these care instructions. They are intended as additional information and serve as non-binding guidelines. We do not claim that they are complete.
